

Resolution on Special Topic Shell Courses

Accepted by the UCF October 25, 2001.

Whereas in the Spring of 2001 the UCF clarified the parameters for levels of course numbering,

and whereas the departments are currently restricted to two of the possible three levels available as a matter of policy,

and whereas the purpose of special topic shell courses is to encourage experimentation at all levels of course development,

therefore, be it resolved that all three levels of special topic shell courses (298, 398, 498) shall be made available to the departments at their discretion.
