

CCD STAFF QUALIFICATIONS AND RESPONSIBILITIES

Position Title

FACULTY AUDIOLOGY CLINICAL SUPERVISOR (UNCLASSIFIED PERSONNEL)

Qualifications

Education: Educational background appropriate for employment as University faculty member. Minimum education, Masters Degree in Communication Disorders from accredited college or university.

Experience: Minimum of three years experience in audiology clinical practice; at least 1 and 1/2 years experience in supervision of graduate level audiologists in a college or university setting; minimum of six months experience in coordinating and scheduling patient-clinician contacts in a clinical setting. These experiences may have been completed concurrently.

Other: Clinical certification in audiology from The American Speech-Language Hearing Association; State of Connecticut Department of Health Services license in audiology; publication record; demonstrated interest in clinical research.

Responsibilities:

Clinical: Assist in coordinating Center Audiological treatment and diagnostic activities; participate in all reviews and revisions of program goals; develop appropriate patient treatment plans with students and assist, when needed, in the execution of the plans; supervise graduate student audiologists in the treatment and diagnosis of auditory disorders; counsel students regarding clinical professionalism, treatment results, and overall progress in the clinical program; complete student grade report forms; provide direct clinical service when required; provide demonstration treatment and diagnosis when appropriate.

Other: Complete clinical research; recommend supplies and equipment purchases to audiology program coordinator; recommend program modifications, when necessary, to coordinator; monitor Center activities in which most directly involved and report problems to coordinator.

Line of responsibility: Audiology Clinics' Coordinator; Center Director; Departmental Chair.
