

# FINANCE FOR PUBLIC UTILITIES PROFESSIONALS

Thursdays

5 – 10 PM

\$995

Department of Finance

School of Business

(203) 392-5349

Fincert@SouthernCT.edu

Program  
Starts  
May 19th

## PROGRAM OVERVIEW

The demand for public utilities professionals in Connecticut is expected to go up due to the eligibility for retirement for a significant proportion of professionals in this sector. This 7-week certificate will supplement the knowledge that Southern Connecticut State University students are currently acquiring through the Public Utilities Management concentration offered by the Management Department. The modules are carefully designed with a focus on public utilities and builds upon prior knowledge (or knowledge that is being acquired concurrently) of public utilities management acquired at SCSU or any other institution.

## PROGRAM MODE

- Seven modules covered over seven weeks (35 total hours) via a mix of live and pre-recorded online sessions delivered through Microsoft Teams.
- Participants should expect to spend additional time to work on assignments. Faculty will be available to provide guidance as and when needed.

## WHO SHOULD REGISTER?

Students who are interested in a career in public utilities, as well as working professionals in this sector who wish to acquire some knowledge of advanced finance concepts.

- Recent Graduates or Graduating Seniors
- Public Utilities Professionals

## PROGRAM REQUIREMENTS

- Microsoft Account and access to Microsoft Teams
- Textbook: To be announced later

## LEARNING OBJECTIVES

Upon completion of this certificate, students are expected to acquire some key analytical finance skills that will help them at their future workplaces in a public utilities company. Students will be provided with a broad overview of concepts pertaining to key finance areas such as corporate finance, investments and financial markets and institutions.

- Orientation and Basics of Financial Computations
- Investments
- Financial Statements, Cash Flows and Working Capital Management
- Financial Modeling
- Corporate Treasury Operations and Management
- Financial Markets and Funding
- Public Utilities Finance Seminar
