**Program
Starts
May 19th**

PROGRAM OVERVIEW

The healthcare industry is getting increasingly complicated and the need for healthcare administrators to effectively manage the day-to-day operations is increasing by leaps and bounds. Healthcare administrators are responsible for making sure that facilities provide quality patient care in tune with the financial resources available to respective healthcare organizations, while navigating through the ever-changing health care regulations.

The certificate is ideal for healthcare professionals who need a better understanding of basic financial computations, cash flows, basic budgets, financial statement analysis and reporting and other financial concepts relevant for the healthcare industry.

PROGRAM MODE

Seven modules covered over 6 weeks (5/19, 5/25, 5/26, 6/2, 6/9, 6/16 and 6/23) in 35 hours:

- In-person: 10 hours. Participants will have the option to join online as well.
- Live and pre-recorded online sessions: 25 hours
- Participants should expect to spend additional time to work on assignments. Faculty will be available to provide guidance as and when needed.

WHO SHOULD REGISTER?

- Graduates from any discipline who are seeking an entry introduction or have just started a career in the healthcare industry.

PROGRAM REQUIREMENTS

- Microsoft Account and access to Microsoft Teams
- Textbook: *Fundamentals of Healthcare Finance* by Reiter and Song (tentative and subject to change depending upon current conditions of the healthcare industry)

LEARNING OBJECTIVES

Designed for working professionals, this instructor-led, hybrid certificate prepares professionals to comprehend financial data and make sound financial decisions affecting health care organizations.

- Basics of Financial Computations
- The Business of Healthcare
- Healthcare Economics and Policy
- Cash Flow and Valuation
- Financial Reporting and Analysis
- Financial Modeling
- Applications/ Wrap-up
