

Cybersecurity Maturity Model Certification (CMMC)

Certified CMMC Professional (CCP) Essentials

What is Certified CMMC Professional Essentials

The CCP Essentials course provides you with an instructor facilitated community, with over eight-hours of content and an introduction and comprehensive overview of the Cybersecurity Maturity Model Certification (CMMC) program.

Participants complete six modules to highlight what makes Southern Connecticut State University and CyberDI CMMC curriculum different while getting a jumpstart on the content we will offer in the Certified CMMC Professional (CCP) Courses.

Topics

- Introduction to the CMMC
- Understanding the Supply Chain
- Protecting Sensitive Data
- Understanding the CMMC Methodology
- Building Business Better Through Cybersecurity
- Network Diagrams and Scope

Engage with Rick Dawson, our leading expert, as he introduces one module from each unit covered, in our full five-day Certified Professional Course.

- Brief self-assessment and an overview video for each module
- Series of engaging online activities with other community members
- Brief post-assessment
- A learner's journal to help track your knowledge growth.

Who must comply with the CMMC?

- All DoD (Department of Defense) contractors
- All defense contractors who seek work with the DoD
- All suppliers at all tiers along the supply chain
- Small businesses
- Commercial item contractors
- Foreign suppliers
- All team members of companies that handle Controlled Unclassified Information (CUI)

Why must companies comply?

Contractors who do not comply with the new certifications cannot apply for future defense funding and could face legal action for incorrectly submitting cybersecurity reports. CMMC certification will soon be a minimum requirement to be eligible for DoD contract awards.

- SCSU is the first and only University offering CMMC certification in conjunction with Data Intelligence (DI)
- SCSU is a top-tier higher education institution that offers a Masters Degree in Cyber Security and world renowned staff and professors
- CyberDI is one of the first approved LPPs in the marketplace.
- Our team includes CMMC Working Group members that helped form the CMMC course objectives.
- Courses are designed by cyber security experts, instructional designers, and educational psychologists.
- Currently performing cyber assessments for the DoD

Faculty

J. Gregory McVerry
