Making Your Course Available to Students

Courses, by default, become available the first day of classes and remain available until 10 days after the last day of classes (ensures grade availability before closing).

You can, if you choose, open your course early or leave it open for a duration of time.

1) Go to the course and from the Customization Control Panel, click “Properties”
2) The Properties window will appear. Scroll to “Set Course Duration” and using the calendar icons, change the start and end dates as you see fit. **DO NOT SELECT CONTINUOUS or DAYS FROM DATE OF ENROLLMENT**, doing so will cause issues with access.

3) Click "Submit" when you are ready.
